DETAILED ACTION

Response to Amendment

The Amendment, filed on December 7, 2006, has been entered and acknowledged by the Examiner.

Cancellation of claim 2 has been entered.

Claims 1 and 3-12 are pending in the instant application.

Allowable Subject Matter

Claims 1 and 3-12 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a black matrix layer, disposed on the top surface of the electrical conducting layer, isolated from a gate electrode of the active component layer and covering margins of the color filter area.

Regarding claims 3-11, claims 3-11 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 12, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 12, and specifically comprising the combined limitations of the entirety of the black matrix layer is disposed on the top surface of the electrical conducting layer, the black matrix layer has an opening, the opening is located above the color filter area, the area of the opening is lightly smaller than the area of the color filter area, and the black matrix layer covers margins of the color filter area as well as the non color filter area.
